# LW39 Series Cam switches

## LW39-25 for DC Function

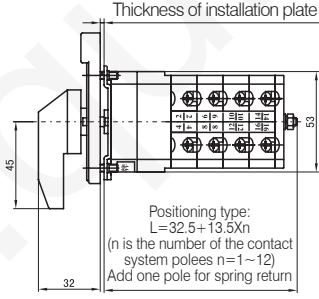

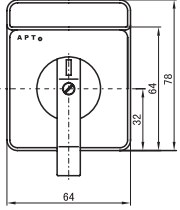

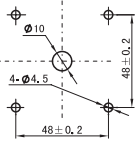

It is the latest product that has been completely independently developed with multiple design patents. LW39-25 is applicable to the application fields with a higher capacity, especially to DC application environment. With The international popular built-in wiring, its safety and reliable. The antifriction-bearing keep the operation gentle and soft, and keep the long mechanical endurance life.

- Ith is 25A, the DC breaking capacity reaches 5A/110V (DC-21)
- Operating angle: 30°, 45°, 90°
- It is extremely rich in the functional features and the maximum number of contact poles is 12
- The gold-plated silver alloy contacts are used, which have greatly guaranteed the contact reliability under low voltage and low current.

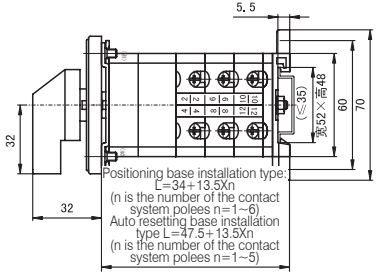

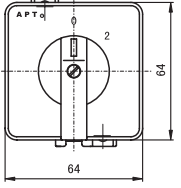

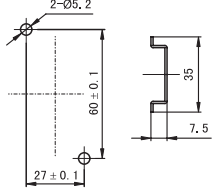

### Normal Type LW39-25

Ordered Model: LW39- 125 YS- □ - □ / □□□□ Refer to page 15 for details

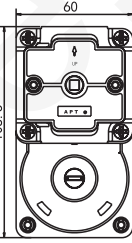

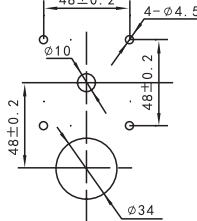

Key Operation: it can be removed at each position and the handle will be locked after the key is taken out. if there is any other requirement, please show us.

## Panel with Key-lock Type LW39-25 YM

Positioning Angle: 45°, 90° Maximum Number poles 12 Handles Type: A, B, C, D

Positioning type:  
 $L=59+13.5Xn$   
(n is the number of the contact system poles  $n=1\sim12$ )  
Add one pole for spring return

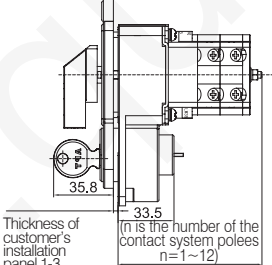

The installation hole size

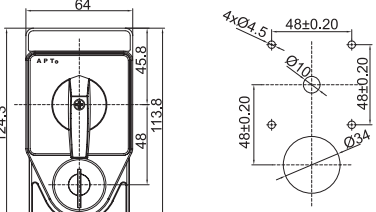

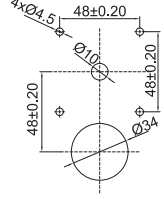

Ordered Model: LW39- 125 YM- □ - □ / □□□□ Refer to page 15 for details

## Panel with Key-lock with label Type LW39-25 PYM

Positioning Angle: 45°, 90° Maximum Number poles 12 Handles Type: A, B, C, D

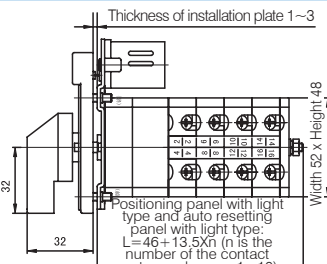

Thickness of customer's installation panel 1-3  
(n is the number of the contact system poles  $n=1\sim12$ )

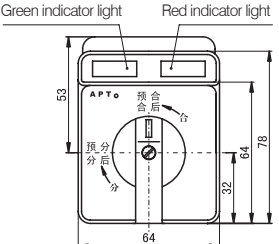

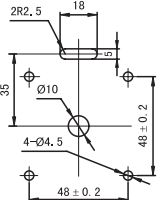

The installation hole size

## Panel with illumination Type LW39-25 DM

Positioning Angle: 30°, 45°, 90° Maximum of 11 pitches Applicable Handles: all

Positioning panel with light type and auto resetting panel with light type:  
 $L=46+13.5Xn$  (n is the number of the contact system poles  $n=1\sim10$ )

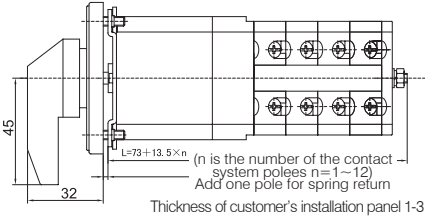

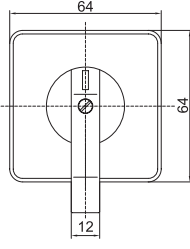

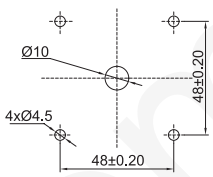

The installation hole size

Ordered Model: LW39- 125 DM- □ - □ / □□□□ Refer to page 15 for details

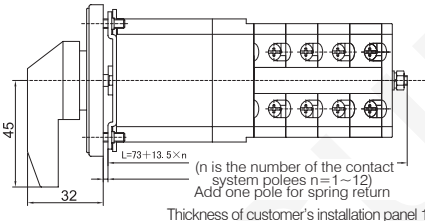

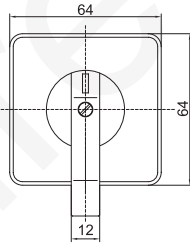

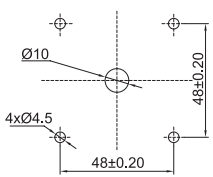

Note: the standard illumination module has 3 common negative-pole wiring terminals: X1(+), XO(-), X2(+).if there is any special wiring requirement ,please show us .

# LW39 Series Cam switches

## Model definition

Please provide the specific model when the user order LW39 series cam switches. There are three ways to confirm the model:

- (1) Select from the models of the ordinary cam switches (please reference to P21—26). Please show us if there is any further requirement;
- (2) Please tell us the model according to the description of model;
- (3) Fill the blank contactor diagram (p28) and we will help you confirm the model.

- LW39-63/16, Please provide the contactor diagram and we will help you to confirm the model.
- Description of illuminate color code and voltage code:
- "g" means green and "r" means red
- "23" means AC/DC24V, "26" means AC/DC110V, "28" means DC220V, and "31" means AC220V.

### Note:

1. The color code has sequence requirement when the cam switch has illuminate modular, with the panel face the front and write the color code from left to right.
2. For example: "-gr23", shows that the left is green light and the right is red light. "-rg"23" shows that the left is red light and the right is green light.
3. Wiring terminal of illuminate modular:
4. The defaulted wiring terminal is common negative poles: X1(-), XO(-), X2(+). Please show us if there is any special wiring requirement.

## Code of Position

The code of position indicates the gear features of the cam switches, including maintained type and spring-return type.

- (1) Maintained type: it does not have spring return function. LW39 series cam switches have 30°, 45°, 60° and 90° position.  
Please attention the position of each models and fill the position codes when you ordered.

Position	Applicable Model	Position circle	Example
30°	LW39-10、LW39-16、 LW39-25、LW39-63		"3KC" indicates 30° position, starting from K and ending at C with clockwise. It has 5 positions K, O, A, B, C.
45°	LW39-10、LW39-16、 LW39-25、LW39-63		"4OB" indicates 45° position, starting from O and ending at B with clockwise. It has 3 positions O, A, B.
60°	LW39-16B、LW39-16C、LW39-63		"6KE" indicates 60° position, starting from K and ending at E clockwise. It has 4 positions - K, A, C, E
90°	LW39-10、LW39-16、 LW39-25、LW39-63		"9GC" indicates 90° position, starting from G and ending at C with clockwise. It has 3 positions - G, A, C.

Position Code Description:  Ending position  
Starting position  
"3" indicates 30°, "4" indicates 45°, "6" indicates 60° and "9" indicates 90°

Note: if the switch is operated without limited in a circle, the ending and starting position will be the same letter, for example: "3JJ" indicates 30° position, starting from -90° with 12 positions without limited.

- (2) Spring return Type: one or more position for spring-return type have spring-return function. LW39 series cam switches have various spring-return function types for option.  
The following table show the commonly used spring-return functions codes.  
Please attention the application models.

Spring-return Position code	Operation Position (Angle)	LW39-10	LW39-16A	LW39-16B LW39-16C	LW39-25	LW39-163

Precautions: “\*”, means the number poles of the cam switch is less than 3;  
if you have more requirement ,please contact our technical department.

### Contactors Codes

The contactor codes can be showed in the model with the following two ways:

1. Inquiry the contactor codes in the 'contactor codes handbook';
2. We can provide you the contactor code according your contactor diagram (P28);

For example:

Requirements: 3 position; the 1st position has 4 contactors closed, the 2nd position has 2 contactors closed and the 3rd position has 4 contactors closed. The contactor codes can be got in the 'contactor codes handbook' as: 424/3.

Junction Code	424/3		
Operation Gear	1	2	3
1-2	×		×
3-4	×		×
5-6	×		×
7-8	×		×
9-10		×	
11-12		×	

If contactor codes can't be found in 'contactor codes handbook' ,you can provide the contactor diagrams to us (fill with “x” letter as the contactor closed on the blank contactor diagram on the P28),and add the “x” letter after the contactor code as the customer requirement.

contactor Code: 424X

Junction Code	424×/3		
Operation Gear	1	2	3
1-2	×		×
3-4	×		
5-6		×	×
7-8	×		×
9-10			×
11-12	×	×	

Note: X in contactor diagram means that the contactor closed.

## Escutcheon Plates Code

The Escutcheon Plates Code of panel indicate the specific requirements for the prints on the panels of the cam switches. The user can select escutcheon plate code according to "Ordinary escutcheon Codes of Panel", or provide the requirements for customization. If there are no show in the Order Models, we will provide the panels according to the defaulted escutcheon plates code rule.

### 1. Defaulted Escutcheon Plates Code:

(1) If one position have no contactor closed, this position plate shall be "0" and then the position on both sides shall be show in sequence of Arabic figure as "1", "2", "3"..... For 3 position cam switch, there is not the plate as of 1-0-1, instead of 1-0-2.

For example:

(2) If the position haven't "0", each position will be showed in sequence of Arabic figure as "1", "2", "3".....(clockwise).

For example:

### 2. Ordinary escutcheon plates:

Notes: the codes starting with A are applicable for LW39-10, LW39-16A, LW39-25 and LW39-63

The codes starting with B are applicable for LW39-16B and LW39-16C

Positioning Angle - 30°

Positioning Angle - 45°

Positioning Angle - 90° and Combined Angles

Positioning Angle - 60°

### 3. Special Plate, add the letter "P" after the pole code.

# LW39 Series Cam switches

## Model and Revision Specification

LW39 series cam switches have been very popular used by users in the market. With the continuously increased in these years, the product functions and models have been also updated so that the meanings of the models of the initially designed products cannot satisfy the ordering demands of the customers. Therefore, after the careful study, it has been decided that the meanings of the original product models shall be modified in this revision.

### The main modifications are as follows:

(1) The two codes "A, B" and "Function Representation" in the old models LW39A-16 and LW39B-16 are integrated into the "function model" in the new model.

(2) "Code of position", for easy memorization and to reduce the errors during the ordering, please use the new code applicable rules in the definition of a new model. (Reference to Code of Position in p16 for details)

(3) The contactor codes can be prepared by the user or us flexibly or follow the existing "contactor codes handbook" for easy memorization and individualized compiling (reference to Code of Position in p17 for details)

Please try to order the products according to the new defining method of the models and we feel sorry for any inconvenience to you!
