2014-2015

## SIGNAL TOWER <br> JD36,JD50,JD70, JD90,JD150

(4) TAYEE

## SIGNAL LAMP

## APPEARANCE

The Europe traditional design style is steady and in good taste,showing originality, endowing your equipment with innervation and vitality, upgrading the appearance and function, making your products coruscate

## DEGREE OF PROTECTION - IP65

In order to make the products widely used in every walk of life, TAYEE follows its consistent high standard during the process of design and manufacture, which makes every product's degree of protection meet IP65 and satisfy your needs.

## VARIETY

The JD-series signal lamps can be divided into 50mm-JD50, $70 \mathrm{~mm}-J D 70,90 \mathrm{~mm}-J D 90$, 150mm-JD150 according to diameter and be divided into single light style and opticalaudible style according to function.

## MATERIAL

The JD-series signal lamps are covered with high-quality materials which has vivid color and good transmissivity and no fading after long time use.

## INDIVIDUATION OPTION

More and more innovation is required in this competitive age. The JD-series signal lamps supply different kinds of appearance for you, such as JD50A, JD50CA, JD70CA, JD70A, JD90B, JD150A, JD150B which can give you individuation production.

## SKETCH MAP FOR MAKING UP PRODUCT AND ITS ACCESSORIES

Drawing of appearance dimension

## Assembly Instructions

Follow the installation dimension to open mounting hole on the Panel or wall openings(recommend mounting hole diameterø 5.2 ,center distance $92 \times 92$ ), two methods of installation:
1.Using 4 ST4.8×12 Self-Tapping Screws drill through the rear cover and fix the production on the panel.(standard)
2.Using 4 hooks to install the production indirectly. (Accessory should be ordered separately.)
3. Standard outgoing line has waterproof latex cover(cable joint should be ordered separately), the method of connection see connection drawing.

## Matters need attention

Horizontal installation base

accessories behind

accessories front
1.The production is divided into $A C 220 \mathrm{~V}$ and DC 24 V . Please pay attention to it when connecting.
2.The measuration distance of sound degree is 1 m , the result of measuration is 100 dB to 110 dB . Keep away from ear when measuring 3.JD Series can be installed on the top of products, $20 / \mathrm{M} 16$ cable connector can be mounted on the bottom

## Introduction for coding

Remove the little window on the rear cover a set of 5 positions coding switch can be seen. There are 20 kinds of tones and music can be adjusted .Refer to the P105.

## JD90F Square Signal Tower

## PERFORMANCE CHARACTERISTIC

JD90F - type combined warning light with consistent high quality of the plaza lights, and steady generous With high brightness, sound audio and other features. There are several forms of light for choice, and by drawing code combination of acoustic components, you can implement different voice conversion, a total of 2 adjustable 0 voices, address customers' diverse needs.

## TECHNICAL PARAMETER

## Guideline of Current

| Type | 24 V | 220 V |
| :---: | :---: | :---: |
| LED light source maximum current | $0.1 \mathrm{~A} / 2.4 \mathrm{~W}$ | $0.01 \mathrm{~A} / 2.2 \mathrm{~W}$ |
| polHorn maximum currentyphony annunciator | $0.125 \mathrm{~A} / 3 \mathrm{~W}$ | $0.009 \mathrm{~A} / 2 \mathrm{~W}$ |
| Decibel | 90 dB | 90 dB |

## Working Environment

| Environment Temperature | $-25^{\circ} \mathrm{C}+55^{\circ} \mathrm{C}$ |
| :---: | :---: |
| Degree of Pollution | class 3 |
| Antivibration | $10-2000 \mathrm{~Hz}, 1 \mathrm{~mm}, 15 \mathrm{~g}$ |
| Degree of Pollution | IP 54 |
| Inatallation Type | $\leq 2000 \mathrm{~m}$ |
| Altitude | $\leq 98 \%$ |
| Relative Mositure of Air |  |

## ORDER TYPE

## Single-light signal lamp

| JD 90F$\qquad$ $\square 90 \mathrm{~mm}$ Square single-light | Optical source + Luminescence modes+ Color |  |  | Voltage |
| :---: | :---: | :---: | :---: | :---: |
|  |  | l | + |  |
|  | LED L | Permanent01 | Red R | DC |
|  | Super Bright LED H | Blink 02 | Green G | 24 V |
|  | Rotating flash 03 |  | Yellow Y | AC |
| Adjustable 04 |  |  | White W | 220 V |
|  |  |  | Blue S |  |

## Diameter Voice element

220 V

Note:JD90F Square warning light can be control saperate, maximum five layers.
(does not include the acoustic component level)

## PRODUCTION CODE

JD90F- order type1 + order type2 + order type3+ order type4

|  | Optical source |  | Luminescence modes |  | Color |  | Voltage |  |

## Dimensional drawing

## Appearance Dimensions

Directly install mounting hole

sidemount install mounting hole

Vertical installation hole map

## FULL INSTRUCTION OF INSTALLATION

## Installation Step

Step 1:Base(or Voice element)connect

Step 2:Optical Components and wire holder(Voice element) connect

Step 3:Optical components and optical component connections

1. Fix down optical components, link connectors of two optical components

Step 4: Cap mounting

1. Align printed label of cap and Optical Components

2. Align printed label of two 3 Optical Components
3. The Optical component to the printed label arrow direction, go to four direction aligned flat

4. Cap to the printed label arrow direction, go to four direction aligned flat

Demonstration for Installation

TestNote:strictly forbid plug or pull internal connector of warning light

## Dial Code instructions

## Optical component code dial

There is a 5 position dial switch at the top of each layer of optical components (Table 1 dial switch) The number $1-5$ on the dial switch corresponds to the numbers $1-5$ on base terminal numbers , can control each layer's warning lights' power. The number 1-5 of Dial switch II corresponding to warning light 1-5 layer optical components When you need to control the layer optical components, To make available the corresponding figures to " on " position, the other digits unchanged. For example: when you need control the second layer optical components, need to get the second layer optical components ( from bottom to top ) in the top of the dial switch II number

## dial switch I

dial switch II

picture 1 2 to " $0 N^{\prime \prime}$, the other digits unchanged. At the top of adjustable optical components, there are two dial switch to control lightiing form. A group of 5 position dial switch, as mentioned above.
dial switch III

picture 2

## Connections Introduction

Seven marks at the behind of the base on the terminal block of JD90F Square warning light:0, 1, 2, 3, 4, 5, M " 0 " represent the Public side of power negative pole
" $1-5$ " represent power positive pole controlling 5layer Optical component of warning light
" M "represent control Acoustic components power positive pole suggestion:Best Conductor wiring specifications $0.5 \mathrm{~mm} 2-1.0 \mathrm{~mm} 2$ Maximum line pressure area 2.5 mm 2

## Attached sheet

## Luminescent dial in the form table

| sequence number | Lighting Form |  | Three dial switch(state) |  |
| :---: | :---: | :---: | :---: | :---: |
| 1 T | Three lights flash one by one $T=0.31 \mathrm{~s} \quad \mathrm{f}=194$ Times / minute | 0 | 0 | 0 |
| 2 T | Three lights flash one by one $T=0.31 \mathrm{~s} \mathrm{f}=194$ Times / minute | 0 | 0 | 1 |
| 3 | Two lights flash one by one $T=0.31 \mathrm{~s} \mathrm{f}=194 \mathrm{Times}$ / minute | 0 | 1 | 0 |
| 4 | One lights flash one by one $T=0.31 \mathrm{~s} \mathrm{f}=194 \mathrm{Times}$ / minute | 0 | 1 | 1 |
| 5 | ON - OFF ( Strobe) T=0.76s f=46Times/minute | 1 | 0 | 0 |
| 6 | ON-OFF (Strobe) T=0.76s $\mathrm{f}=46$ Times/minute | 1 | 0 | 1 |
| 7 | Permanent | 1 | 1 | 0 |
| 8 | Off | 1 | 1 | 1 |

## Voice dial table

| No |  | Key name | Audio frequency | Repeating tone cycle | Five position dial switch(state) |  |  |  |  |
